

## CANNING TECHNOLOGY

**EASY RIDER – THE SEAMING ROLL MADE  
TO MEET THE HIGHEST DEMANDS IN  
THE BEVERAGE INDUSTRY**

Seams  
up to **70**<sup>\*</sup> million  
cans

# EASY RIDER

The seaming roll sets  
new standards in the seaming of beverage cans.

## The facts about the new generation of seaming rolls from Ferrum speak for themselves:

- + Long service life thanks to modern, high quality materials
- + Seams up to 70 million cans with no maintenance required
- + The seaming roll comes ready to install
- + The Easy Rider has been proven and tested countless times over several years
- + Closes cans cleanly and gently – guaranteeing the highest product quality

We are now equipping beverage can seamers with the new Easy Rider. The Easy Rider is also very well-suited for retrofitting.

\* The service life of the Easy Rider seaming roll is typically 30–70 million cans and strongly depends on various factors: Correct setting of the seamer, can and end material, properties of the end paint, cleaning of the rolls and seamer, etc. This list is not conclusive. For this reason, Ferrum cannot accept any guarantee for the service life of the seaming rolls. You can find further information on our website: [www.ferrum.net](http://www.ferrum.net)
